(a) activities of daily living
early improvement
fENI
Barthel Index (0 to 20)
entry
discharge
(b) balance
Berg Balance Scale (0 to 56)
entry
discharge
(c) NIHSS change vs entry ADL
ρ = 0.46, n = 26
Barthel Index at entry
NIHSS reduction to discharge, points
(d) glucose vs entry ADL
ρ = −0.47, n = 26
Barthel Index at entry
admission glucose, mg/dl (log scale)
(e) effect sizes by phenotype
Barthel, entry
Berg, entry
TCT, entry
SAS, entry
Barthel, discharge
Berg, discharge
TCT, discharge
SAS, discharge
Rehabilitation stay
SMD, fENI minus early improvement
(f) admission among survivors
Mann–Whitney p = 0.555
admission glucose, mg/dl (log scale)
not admitted
admitted
